

Kitchen & Bathroom Design Process and Guide

Before Your Visit

Here are some information you can bring to help speed up the process. These items can also be done during a site visit by one of our team members.

Remodel

1. Pictures of Existing Kitchen or Bathroom
2. Appliance Selections, if selected
3. Ceiling Height
4. Style of Cabinet, if possible

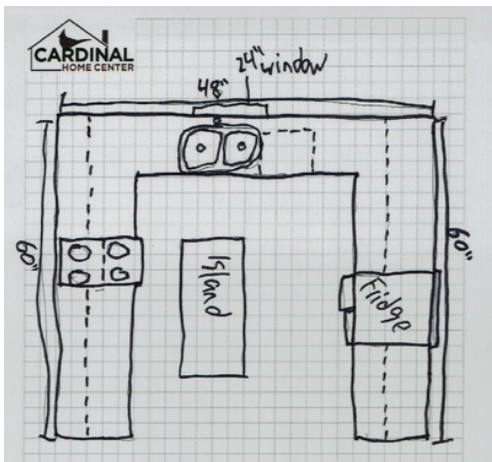

New Construction

1. Copy of House Plans (send beforehand if possible)
2. Appliance Selections
3. Ceiling Height
4. Style of Cabinet

1 Meet with Us - On the Phone or In the Store

Start creating your ideal kitchen or bathroom with our designers. Schedule a time that works for you, either in-store or over the phone. Our designers are available during the week and on some Saturdays. We will get a sense of your taste and budget during this meeting, and we may share some tips and other ideas along the way. It may also be helpful to provide a rough sketch of your space (grid paper attached for your convenience). To speed up your consultation, please pass along:

- Your contact information
- Address of the remodel
- Preferred project timeline
- Contractor information

2 View Products to Bring Your Vision to Life

Our consultation will start by reviewing your intended timeline, contractor information, and more job site information. From there, we will walk through our showroom and go through different options that fit your budget and style. This consultation can include looking at cabinet and countertop colors and making the most of your space with its layout.

3 Confirm Your Design

After picking out your materials, we will begin to put together your design using our intuitive 20-20 software. We may have some questions along the way that we will reach out to ensure we align with your goals. Depending on availability or what will work in your space, we may also refine some of the brands or product lines.

4 View Your 3-D Rendering

Once our design is complete, we will send you a copy of your 3-D rendering and coordinate a time for you to come in and finalize your space. This rendering will give you an idea of your room with the cabinets and styles you selected. We will go over any final budget details, and we can make modifications or edits based on the presentation.

Kitchen & Bathroom Design Process and Guide

7 Place Order and Confirm Delivery

After final measurements, we are ready to place your order. At the time of order, we will require a deposit. While your cabinets are in production, our team will reach out to coordinate the ordering of all the remaining items for your project, such as cabinet hardware, countertops, backsplash, and flooring.

8 Receive Your Products

Your products will arrive at our Madison or Crozet locations, depending on where you order. Once products arrive at our store, we will call you to schedule the best time for delivery. In some cases, we can coordinate directly with your contractor to ensure they are present during delivery.

9 Follow-Up by Our Team

Once your materials are installed, our team will reach out to check in on your space. We want to ensure you are completely satisfied and answer any product-related questions you might have. We may even ask for a few photos of your completed project so that we can share them with our future clients.

5 Make Final Adjustments

If, after the 3-D presentation, there are still some materials you would like to change, we will pick out some options that will work in the overall design and budget. Depending on the number of requested changes, these modifications will take about a week but can take longer. We will give you a copy of the final plan before ordering.

6 Take Final Measurements

Before ordering, we may come out and do a final site measurement. In some cases, a contractor can confirm these measurements for us.

Schedule a Consultation

Ready to get started? Contact us at 800.844.9234, visit our stores in Madison, Charlottesville, or Crozet, or visit [CardinalHomeCenter.com/Cabinets/](https://www.CardinalHomeCenter.com/Cabinets/)
